

Access and visualize your engineering data simply and intelligently

Currently, products' data is one of the most important value for companies, because the decisions made with this information can significantly impact your business, including product reliability and safety, speed in innovation or on-time delivery according to budget, for example.

In order to make good decisions and avoid bad repercussions, it is essential that all the users involved can access to the updated product information whenever it is needed it.

IntegralSoft Viewer allows the different stakeholders involved to easily access the data stored in the organization's business system, without the need for high level of training.

IntegralSoft Viewer allows different users to spend less time searching for data and more time for their main activity.

Why choose IntegralSoft Viewer?

Most software tools are inaccessible to a large part of an organization's workers due to high licensing costs, need for intensive training or time it takes to integrate or customize them.

With **IntegralSoft Viewer** you can connect all those involved in a project so that they can quickly and easily access the data stored in the business system, always updated.

General Tool Specifications

Adaptable: **IntegralSoft Viewer** has simple controls that limit or extend what can be seen and searched in the selected properties and attributes of the data.

Full data access: with **IntegralSoft Viewer** you can browse the product structure and you can view and download the associated documents: 3D models, PDF drawings, other PDF documents.

System independent: back-end systems can be updated independently without interrupting user activity with updates, data migrations, substitutions and so on.

Secure: with **IntegralSoft Viewer** the data is limited to the security permissions that the user has been assigned in the registration system, so they will always be safe.

Your engineering data always updated and accessible

IntegralSoft Viewer is a solution that allows more company stakeholders to access product data that comes from multiple registration systems and to consult or interact with them from a simple, role-based interface.

With a renewed user experience that is simple to use, **IntegralSoft Viewer** is ideal for anyone interested in the life cycle of a product that needs access to the latest and most accurate recent information to drive critical decisions.

In addition, **IntegralSoft Viewer** could integrate directly with enterprise systems while offering a highly intuitive user experience, guaranteeing accuracy, confidence and high fidelity to product data.

Use your data more efficiently

IntegralSoft Viewer features make PLM data hosted in PTC Windchill available in a highly consumable way.

By democratizing engineering data in this way, teams can easily access the only source of truth, in real time and managed by changes, of product knowledge, ensuring that each stakeholder involved in the product life cycle takes advantage of accurate information for your decisions.

IntegralSoft Viewer Advantages

> **Connect** product data with ease:

- **Precise decision making:** wide visibility of enterprise systems.
- **Higher product quality:** actions and decisions controlled by updated information.
- **Higher value:** expand existing technologies to more users for better adoption.

> **Test** the data in new ways:

- **Intuitive:** modern, accessible UI that does not require training.
- **Role-based:** contextualize data from many sources based on user needs.
- **Quick to obtain value:** quickly implement a structural visualization system for your products with direct access to the plans and associated documentation.

What's New IntegralSoft Viewer 2.0

Accessible to suppliers

The new version allows external personnel, such as customers or suppliers, to access the environment and view, by means of permissions, what is required.

File packages

Currently, it is possible to generate and download a .zip file with all the viewables of all the children of a selected main set.

More downloadable formats

IntegralSoft Viewer 2.0 allows viewing and downloading documents in more formats. Currently, pdf, step, dxf, pvz, etc. formats are supported.

Improved 3D viewer

The quality and performance of the 3D product viewer has been improve.

Interface redesign

IntegralSoft Viewer 2.0 comes loaded with changes in the user interface, with a much more intuitive and attractive design. It also allows customization with your company logo.

Folder display

It allows you to browse content through Windchill folders.

Technical requirements

- > Windchill 11.0 M030 installed.
- > Worker Configurator to publish Step.
- > 3dTool license to publish to IntegralSoft Viewer.
