

Simplifies role-based project management

INTEGRALSOFT WINDCHILL PROJECT APPS

The different applications of **IntegralSoft Windchill Project Apps** facilitate the management of role-based projects, extending and simplifying the use of **Windchill Project Management**.

The following are the applications included in the **IntegralSoft Windchill Project Apps** package, which can be purchased individually or together:

IntegralSoft TimeSheet

IntegralSoft Project Dashboard

(Application under development, currently not available)

IntegralSoft TimeSheet

Get exhaustive control of the time spent on each project

Facilitates Windchill and non-Windchill users and resources to record the time spent on the different assigned activities of a Project Plan defined in Windchill.

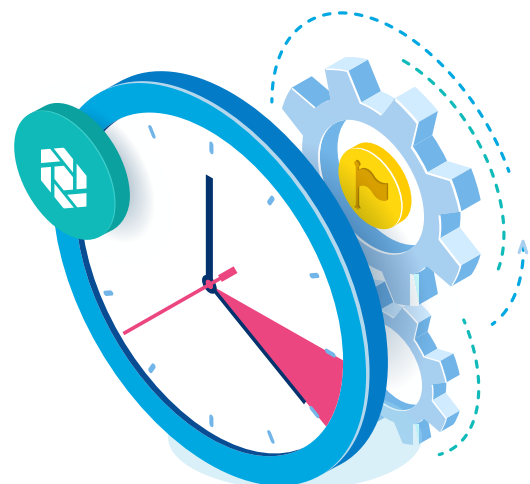

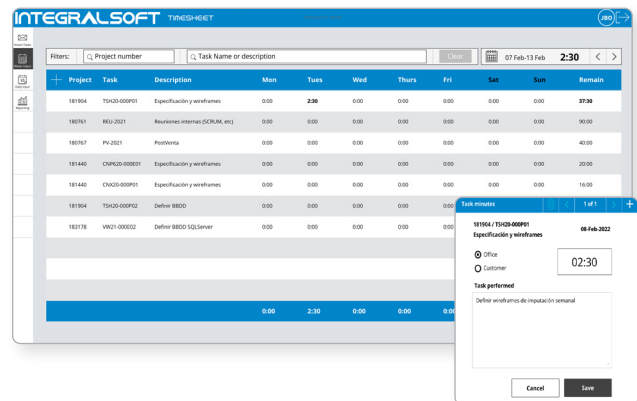

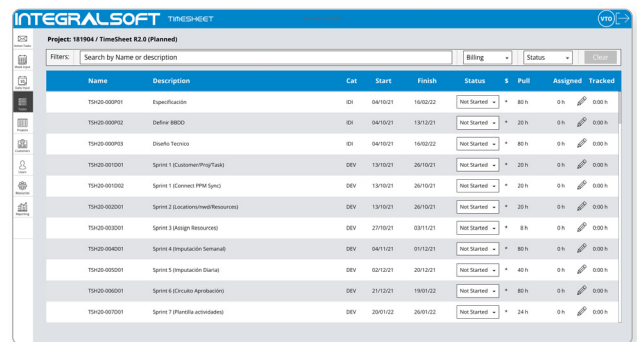

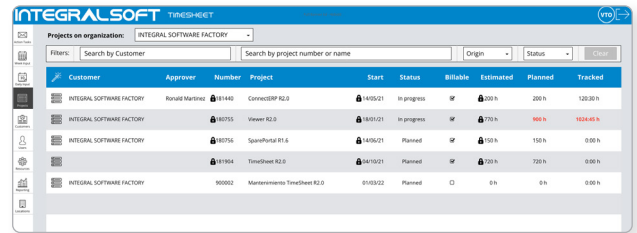

With **IntegralSoft TimeSheet** you will be able to reduce time considerably, as well as have absolute control of the time spent by each of the resources in each of the tasks.

Main functions

- > Customer management
- > Project management
- > Task planning
- > Weekly imputation: imputation of planned tasks by time and description

Benefits

- > Allows to capture the actual work for all resources of all projects, avoiding errors.
- > Allows to keep traceability of all imputations, getting a total view of all resources involved in a project.
- > Allows weekly control of imputations versus working time.
- > Allows project managers to review and approve any imputations previously to synchronize with Windchill.

An isometric illustration of a workspace. In the top left, a person is climbing a ladder. In the top center, a person is holding a large pencil. In the center, a person is climbing a ladder. In the bottom right, a person is holding a large pencil. The background is filled with various icons: a clock, a checklist, a document, a camera, and a magnifying glass. The text 'INTEGRALSOFT' is prominently displayed in the center.
